

List of question (Wireless Network)

1. Definition of Primary user and Secondary user.
2. Definition of False alarm and Misdetection.
3. What is Cooperative Spectrum Sensing Explain with figure.
4. What is Cell Cluster? Draw the appropriate diagram.
5. Difference between Adjacent channel interference and Co-channel
6. Definition of Handover. Give two reasons when handover failure occurs.
7. Define Frequency Reuse Distance.
8. Why Hexagonal cell is used in WAN?
9. Why sectored antennas is preferable for the network of congested area?
Draw 7/21, 3/9, 4/12 cell patterns.
10. Explain Iridium System and Global Star System with Architecture.
11. Describe the benefits of Wireless LAN.
12. Explain major problems of Wireless Network.
13. Write the Wireless LAN requirements.
14. What is the main problem of infrared LAN? How optical signal is conveyed in infrared LAN? (using DBIR and DFIR)
15. Describe in short about Li-Fi and Narrow band RF LANs.
16. Difference between OSI and IEEE 802 with architecture.
17. Explain the Frame Format of IEEE 802.11 with figure. Describe the functions of some fields of IEEE 802.11 Frame Format.
18. Why use Binary Exponential Backoff Algorithm?
19. Maths on Network Traffic
20. Why CA is used in wireless network instead of CD?
21. Show the arrangement of spread spectrum technique with pulse diagram.
22. Basic concepts of CDMA Spread spectrum with diagram and write the reason of using CDMA in wireless network.
23. Define OFDM and write some advantages of using OFDM
24. Give the concept of piconet and scatternet with appropriate diagram. (41,43)
25. Compare synchronous connection-oriented link (SCO) and asynchronous connectionless link(ACL).
26. Short note on Zegbee.
